Full Stack Developer

Objective:

To take a challenging role as programmer in a highly technical company where I could utilize my skills in designing, programming, developing and solve problems for Software Products and uses my experience for providing quality service to the company, and develop myself by taking my skills in self-Learning for getting our company goals

Project and Experience:

web application Social Media MVC and Rest API

for Back-end springBoot, used spring security configurations for Authentication & Authorization
spring mail for Users verification, build with OOP & dependency injection in business layer
for data layer I was usage Hibernate ORM framework with JPA for data flow, and connect to MySQL.
I was writed Rest API for dashboard controllers with springRest.
for Front-end I am used Thymeleaf framwork with jquery, ajax and bootstrap for stayling.
I was dockerize and implementation this software in linux Centos VPS.
